

ANNOUNCEMENT:

Dairy Barn & Kohman Wing Guidelines

- Aisles will be set up to be one-way, to encourage orderly movement of visitors. Aisles on the south side of both barns will include signage to move people from west to east, while aisles on the north side of both barns will have signage to move people from east to west.
- Aisles should be kept as clear and open as possible to allow easy movement of people. The presence of tack and feed supplies along the aisles is certainly permissible and understood.
- Fans in the barns will be on to encourage air movement, which is beneficial for the health of the animals - as well as the exhibitors and guests. Keep obstructions to air movement to a minimum, as it relates to both the windows in the barns as well as the fans.
- Signage related to exhibitor's projects is permissible. The Fair Board does request that any signage be removed when the exhibits are removed from the grounds.
- In accordance with the fair's plans, approved by the Health Department, we would ask that you practice social distancing in the barns.
